

ESSE-PHOS

Starter with acidifying effect

- Fast rooting effect
- High content of Phosphorus and Sulphur
- Prompt & durable acidifying effect:
 - recommended for calcareous and alkaline soils
 - recommended to acidify the nutrient solution

CHARACTERISTICS

ESSE-PHOS is a strong acidifying fertilizer based on phosphoric and sulphuric acid. **ESSE-PHOS** is mainly applied to lower the pH of alkaline soils or in blend with nutrient solutions.

RESULTS

Applied at the beginning of the vegetative period or after transplanting, **ESSE-PHOS** promotes the development of the root system and prepares the plant for optimal flowering.

ESSE-PHOS

Starter with acidifying effect

APPLICATION RATE

Crop	Drip irrigation (L/ha)	N° of applications	Timing of applications
fruit trees, grape, olive trees	10 - 30	1 - 2	from sprouting till flowering
vegetables and ornamental crops	10 - 30	1 - 2	after transplanting, during early stages
greenhouse crops	10 - 30	1 - 2	after transplanting, during early stages

COMPOSITION

	% w/w	% w/v
Phosphorous pentoxide (P ₂ O ₅) water soluble	28,0	39,2
Sulphur trioxide (SO ₃) water soluble	20,0	28,0

APPEARANCE	Liquid
COLOUR	Greenish
pH (1% sol.)	1,0÷2,0 at 20 °C
DENSITY	1380÷1420 g/L at 20 °C
PACKAGING	6L (6Lx2); 20L
