

MULTIPHOS Mg

Greening effect & starter

- Quick absorption (even in case of low temperatures conditions)
- Vegetative booster if applied by foliar spray (high Magnesium content)
- Starter if applied by drip irrigation (high Phosphorus content)
- Acidifying action: low the pH of the nutrient solution

CHARACTERISTICS

MULTIPHOS Mg is a liquid fertilizer that can be used after transplanting until vegetative growth development and after flowering.

MULTIPHOS Mg is a special fertilizer that supplies promptly available Phosphorus, Potassium and Magnesium.

RESULTS

The Phosphorus contained in **MULTIPHOS Mg** stimulates root induction, flowering, ripening and improves the color of fruits because it is involved in the polymerization of the anthocyanin chains. Magnesium, being the main constituent of chlorophyll, plays an important role for photosynthetic efficiency.

MULTIPHOS Mg

Greening effect & starter

APPLICATION RATE

Crop	Foliar spray (L/ha)	Drip irrigation (L/ha)	N° of applications	Timing of applications
cereals and industrial crops	4 - 6		1	during early stages
fruit trees, grape, olive trees	4 - 6	10 - 20	1 - 2	before and after flowering
vegetables and ornamental crops	4 - 6	10 - 20	1 - 2	after transplanting
greenhouse crops		10 - 20	1 - 3	after transplanting (used to lower pH of nutrient solution)

COMPOSITION

	% w/w	% w/v
Phosphorus pentoxide (P ₂ O ₅) water soluble	30,0	45,0
Potassium oxide (K ₂ O) water soluble	5,0	7,5
Magnesium oxide (MgO) water soluble	7,0	10,5

APPEARANCE	Liquid
COLOUR	Colourless
pH	1,5÷3,5 at 20 °C
DENSITY	1490÷1510 g/L at 20 °C
PACKAGING	1L (1Lx16); 6L (6Lx2); 20L
